

Targeting

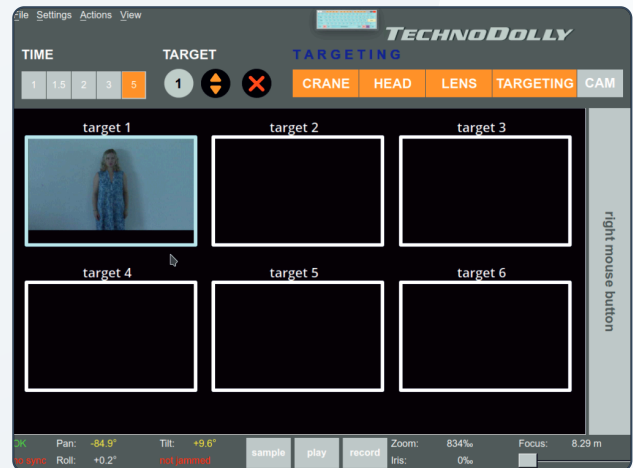

1 STEP ONE

Touch TARGETING tab to toggle on/off live targeting.

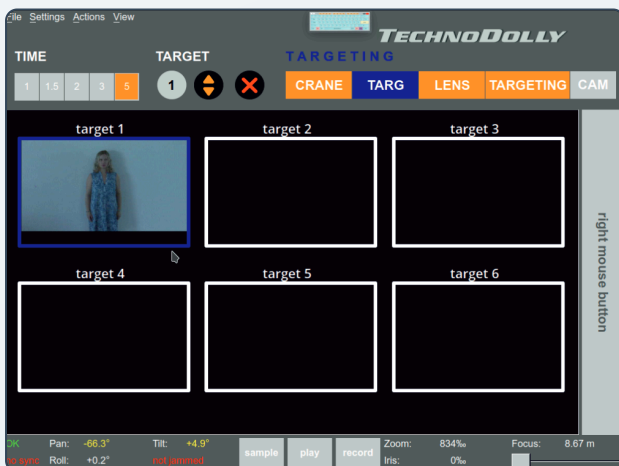

2 STEP TWO

Point crosshair to subject and tap (target #1) to set 1st Ray of triangulation.

3 STEP THREE

Maintaining the same crosshair placement: Position camera 90 degrees from 1st Ray and tap (target #1) to set 2nd Ray.

4 STEP FOUR

Target is now triangulated and highlighted blue. Additional target highlighted in green when ready to use.

Adjust transition time between targets by tapping choice in seconds.
Delete and replace any target by tapping the red "X" next to Target number.
